Ability to meet any challenge

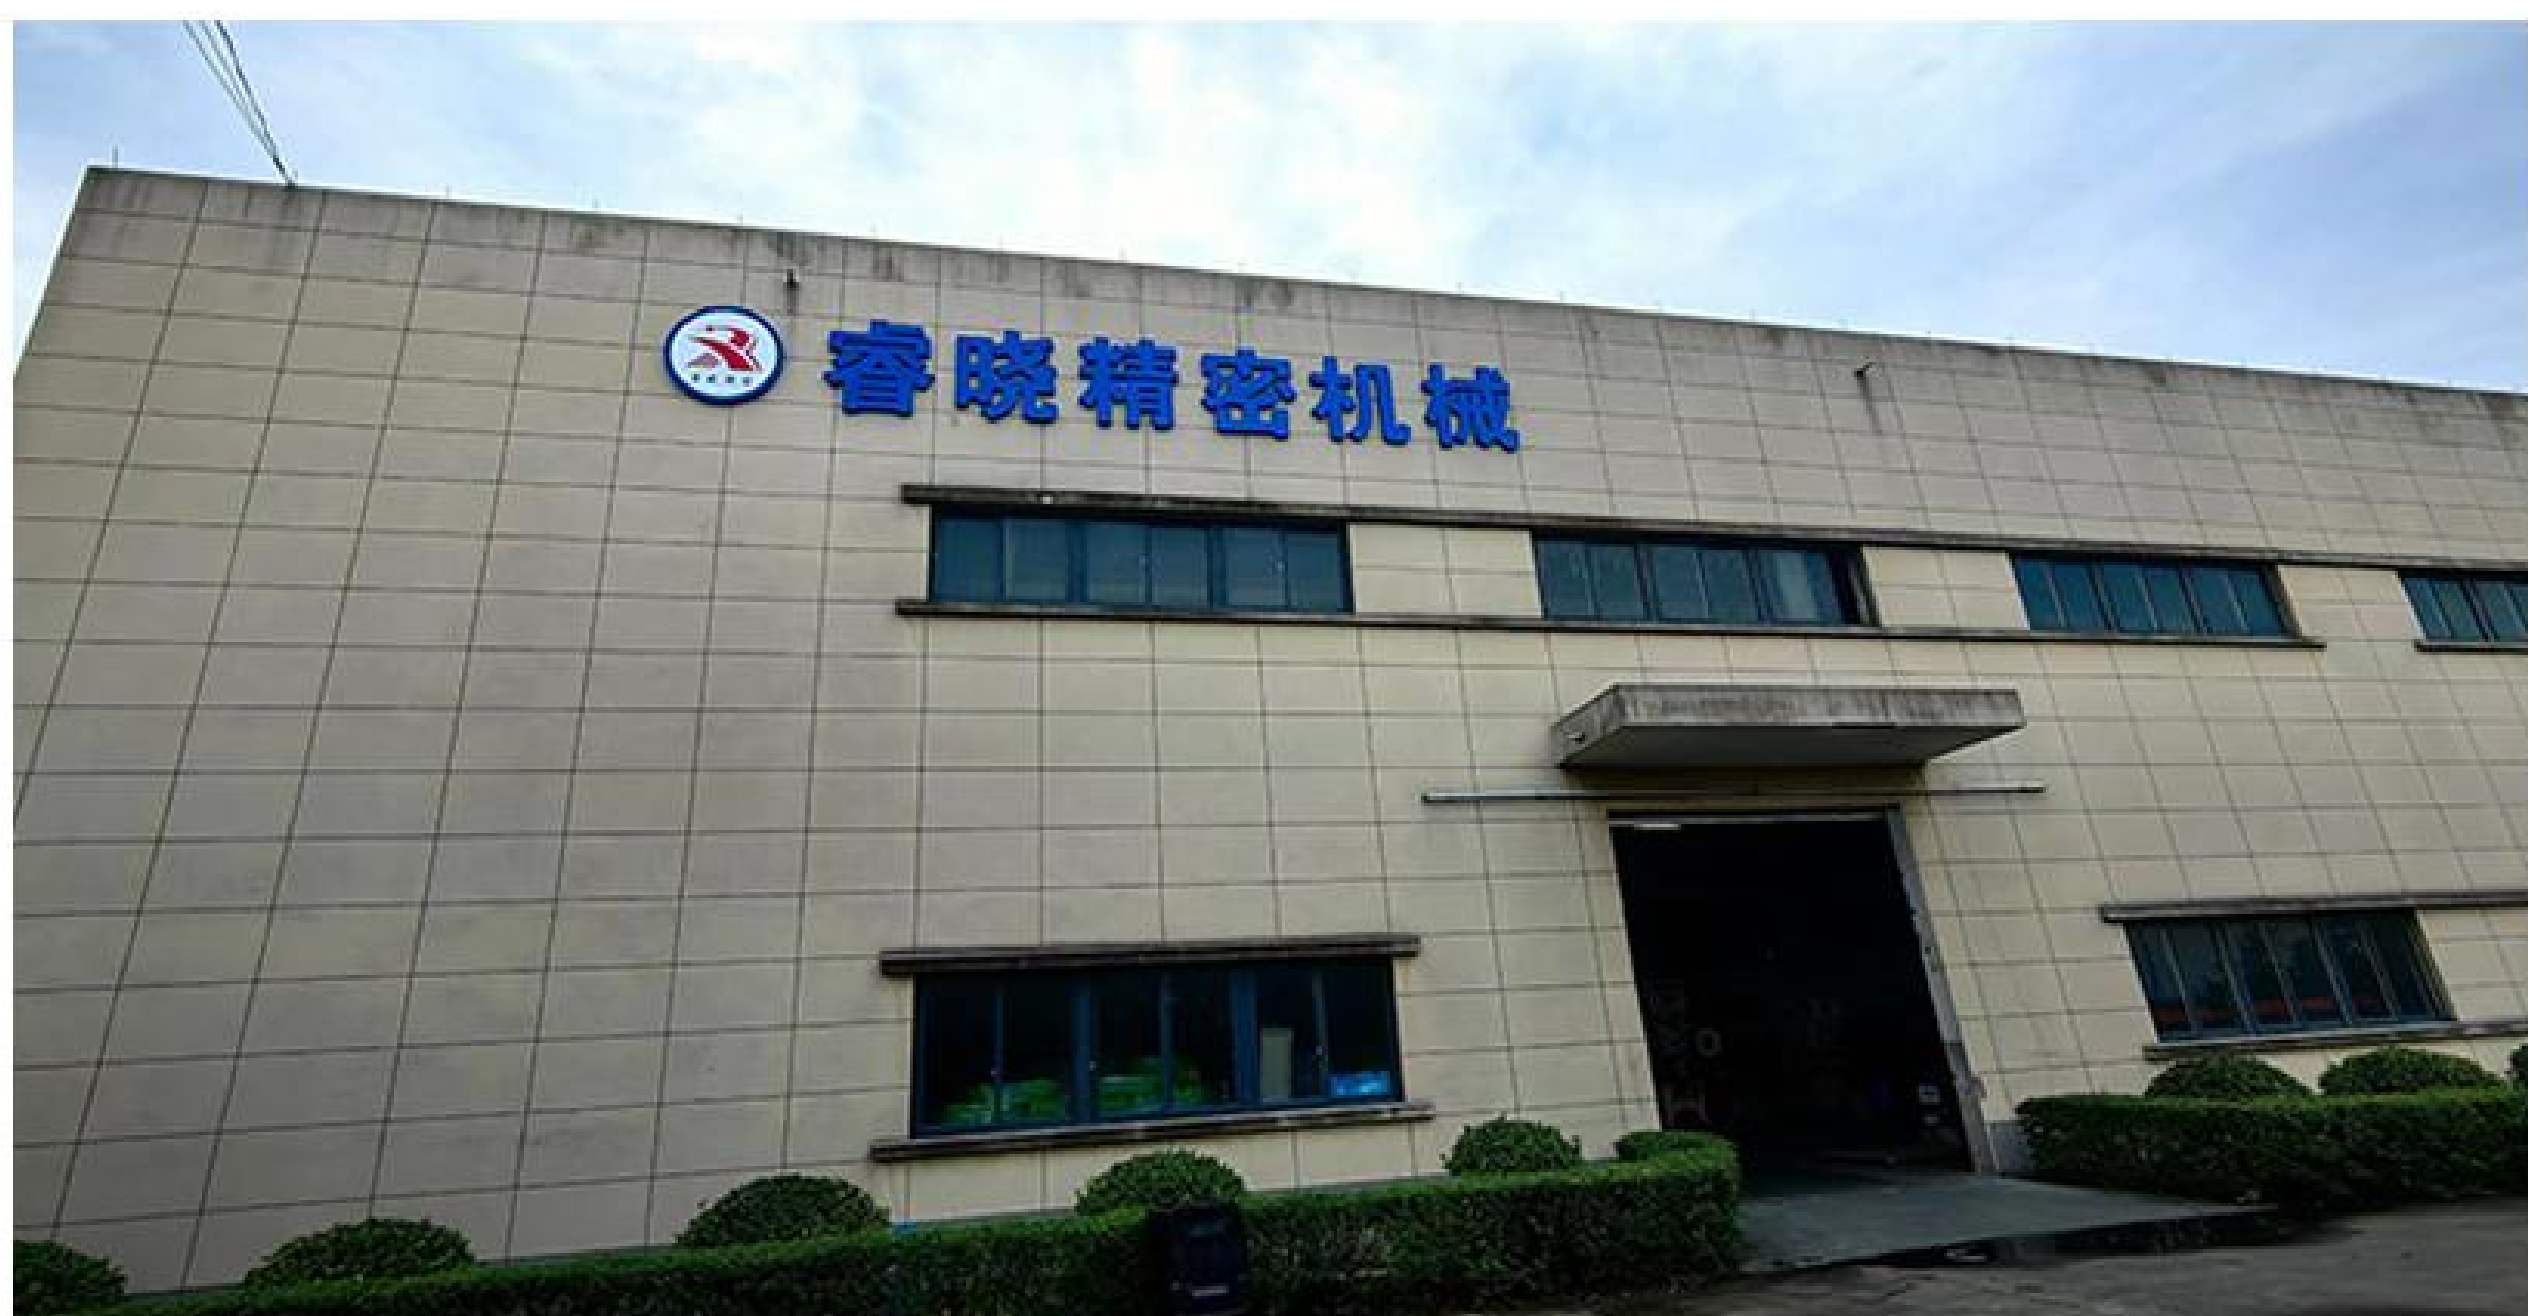

Xinjiang Steed International Trade Co., Ltd is a production and processing company integrating R&D and sales,mainly selling trolleys,caster wheels,hardware accessories and other products. The main sales countries are: Russia, Australia, Central Asia, Southeast Asia, etc..

Our factory is located in Jiaxing, Zhejiang.It has a 5,000-square-meter production workshop, multiple automated production lines, rich

production experience,with a complete and scientific quality management system.

The company's integrity ,strength and product quality are recognized by the industry.

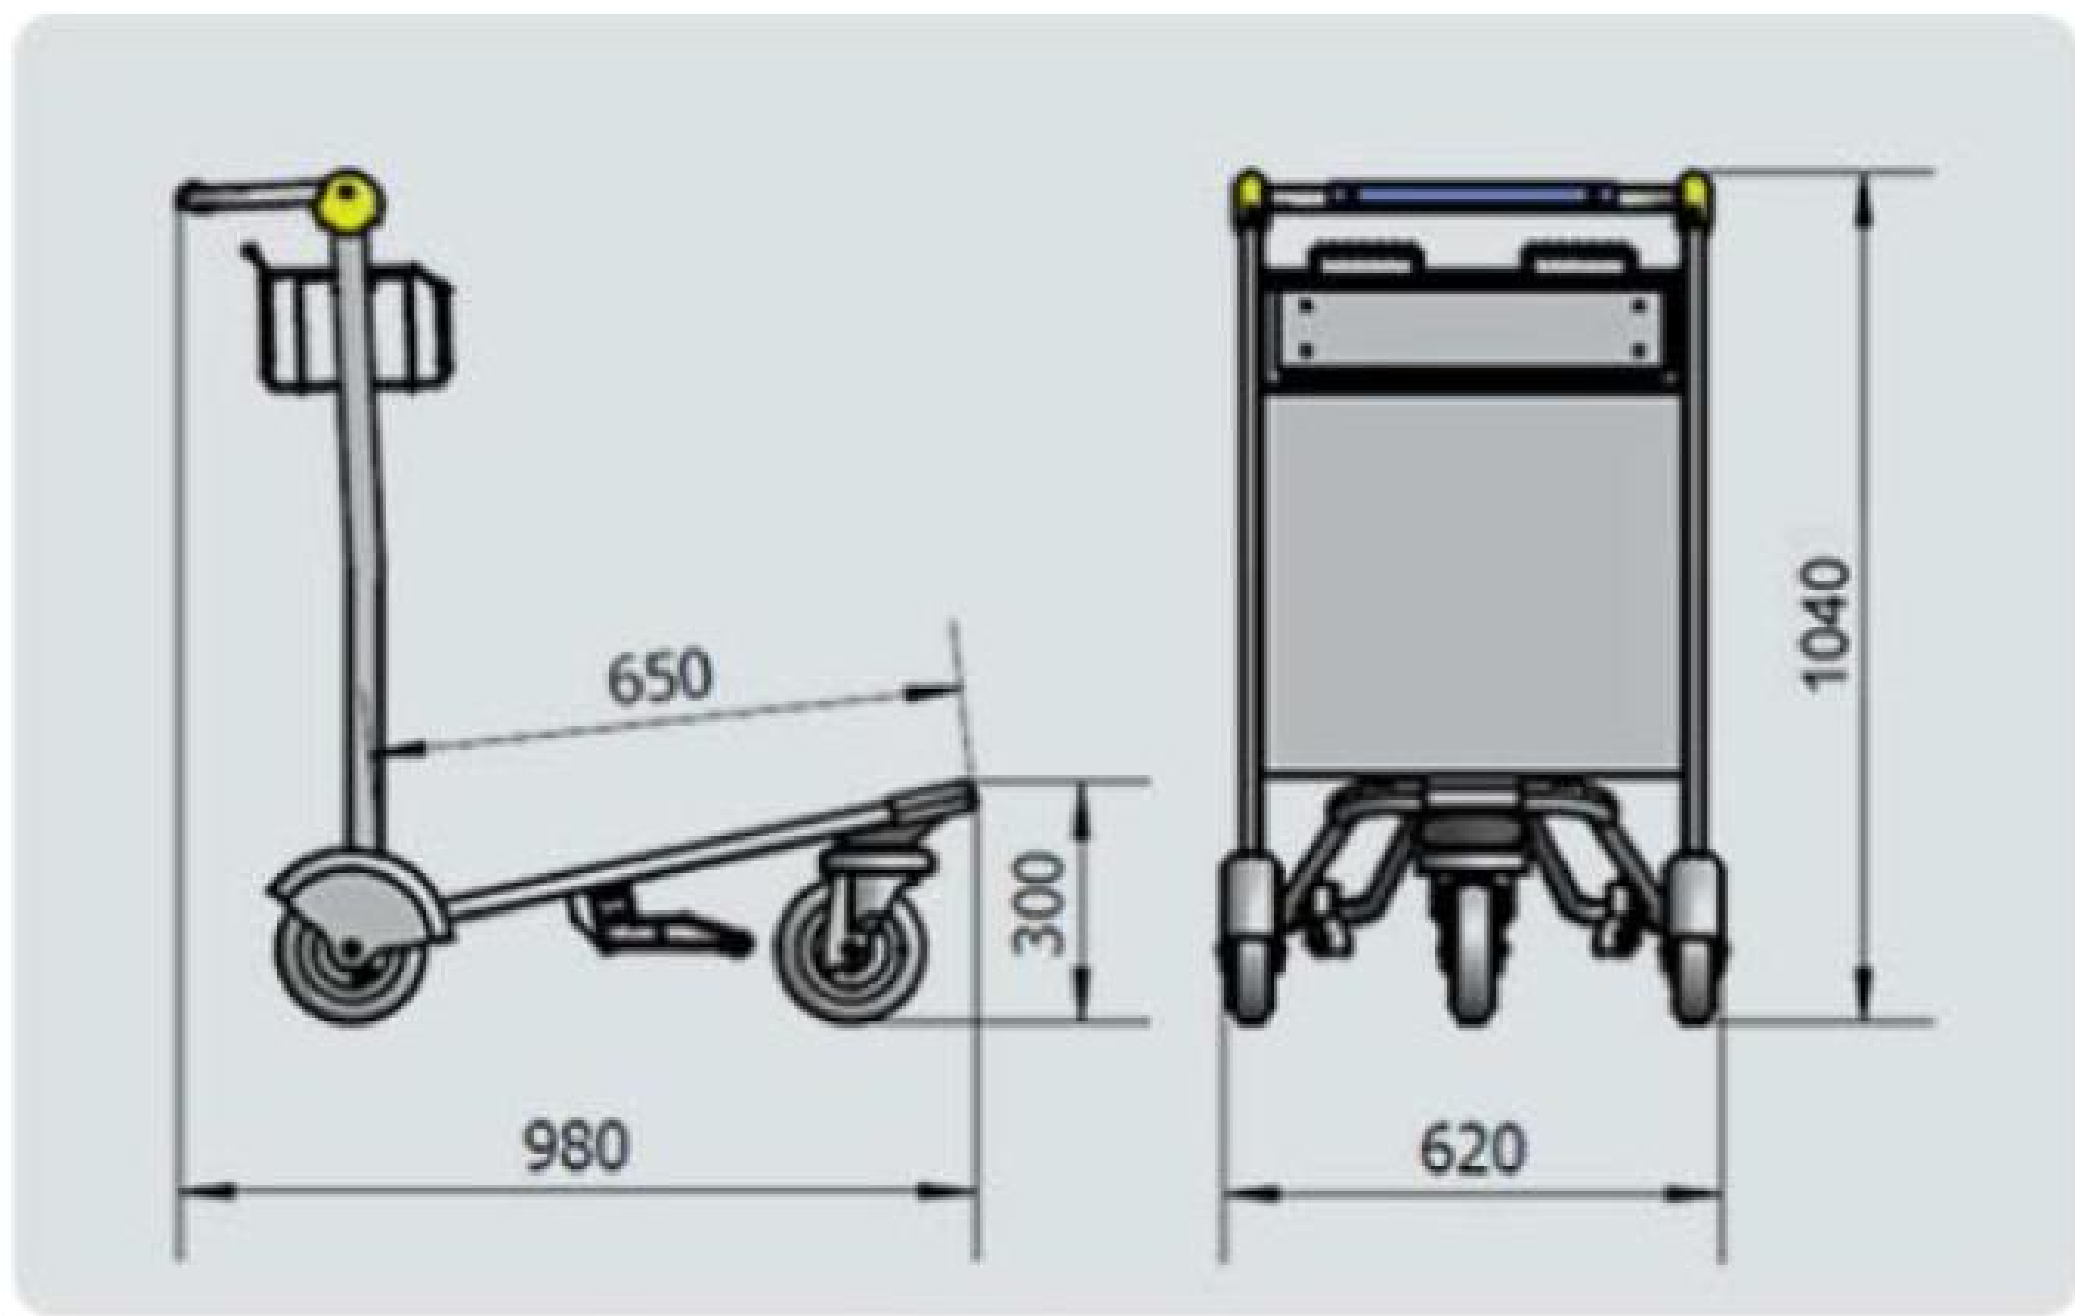

Welcome friends form all walks of life to visit ,guide and negotiate business.

General view

Professional production

Excellent design

STEED INTERNATIONAL

Our processes and technologies originated in military products.

Quality Brake System

- Perfect braking through metallic brake shoe on the natural rubber surface of the castor
- Minimal wear as braking only occurs on the sides of the castor with no effect on the tread
- Brake adjusts itself to ensure a consistent braking force

Function of Nesting

- Nested trolleys to save space including easily pushed and pulled along
- Engagement system for transport of more than 40 trolleys by airport scooter & 10~20 trolleys by manual

Excellent Wheels

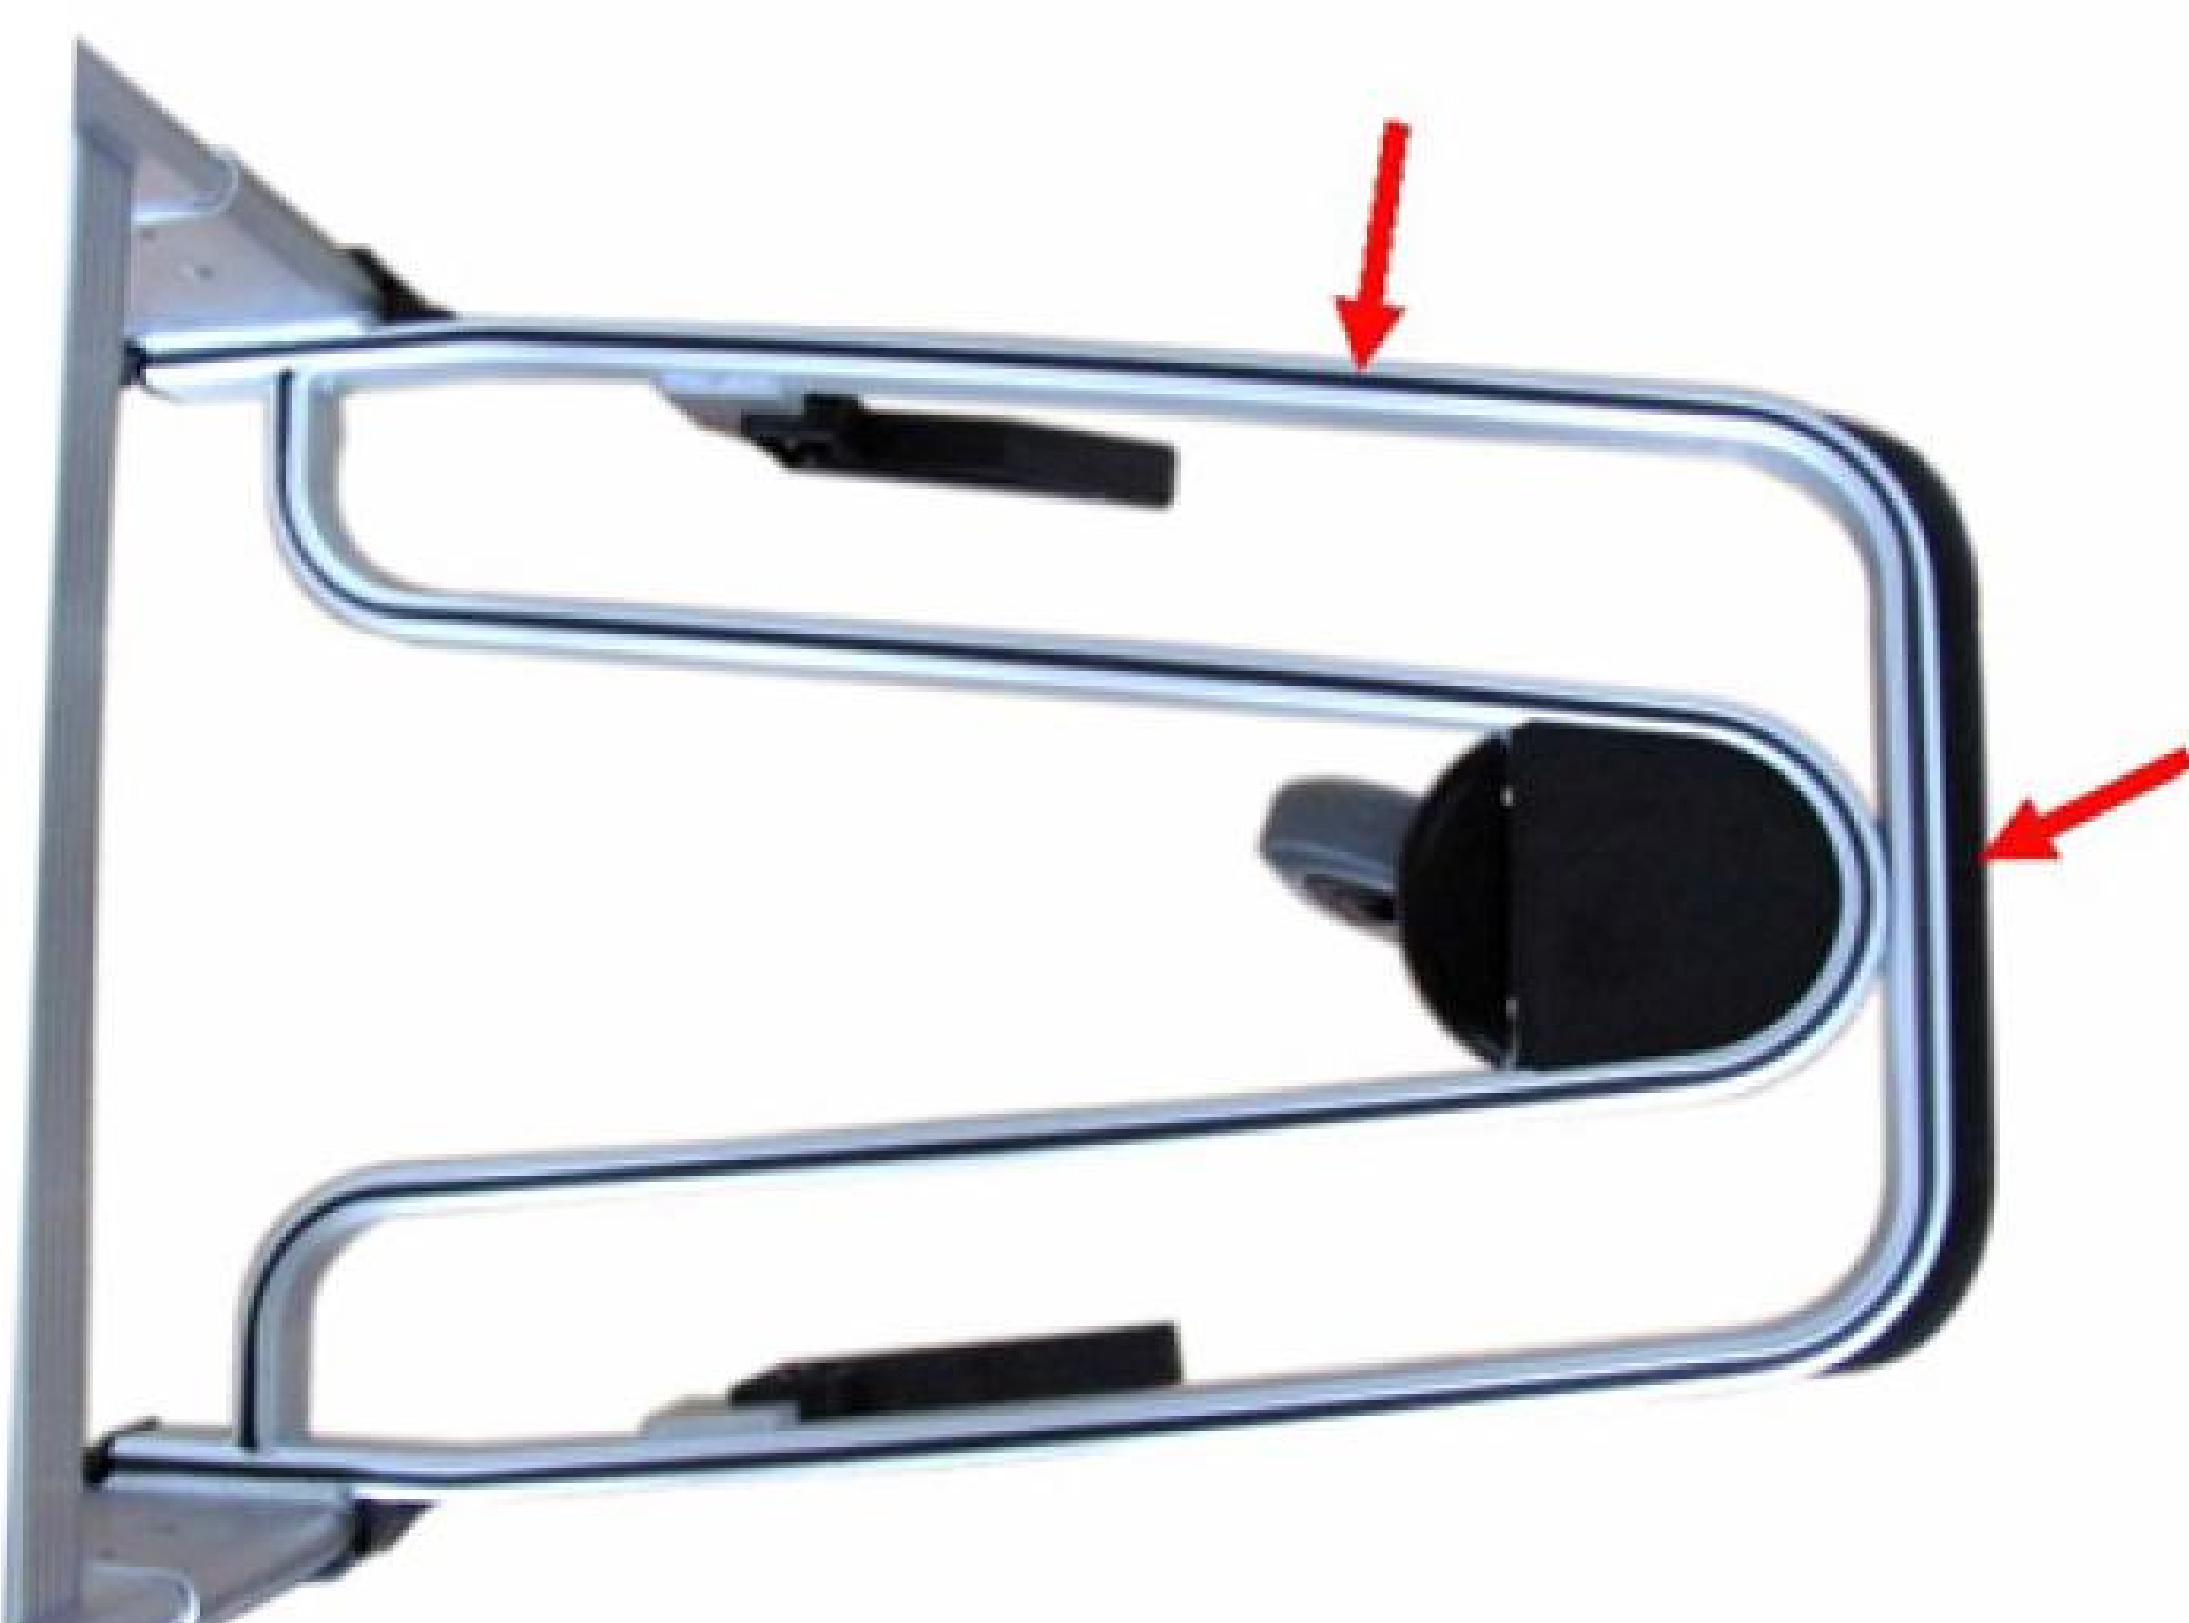

- Nature rubber material
- Minimal wear
- Non-marking (leaves no residue)
- Double-sealed industrial ball bearing
- Shock-absorption & antinoise

Advertising Space

- 7 postions for displaying advertisement
- More than 6000 cm2 advertisement space for most models
- Lease the advertising space to get economic effect
- It's good choice for advertising company to attract quality clients

Luggage Protection

- TPU/Rubber bumper strip
- Anti-slip and anti-noise rubber strips embedded in the platform

Dust-proof Cover & Customized Braket

- Dust-proof cover for swivel wheel
- Customized braket for stable & flexible steering of front wheel

LUGGAGE TROLLEY DISPENSING SYSTEM

The steady growth of the air passenger market has shaped the new image of the air-traveler, more demanding than ever with higher standards and expectations.

The luggage trolley management system is used the airport around the globe to enhance the passenger experience by offering a high quality service while bringing additional revenues to the airport, ensuring smooth operation and improving the overall image of the airport.

SYSTEM VERSIONS

1. A RENTAL SERVICE

Self-financing solution whereby the user pays for the rental of a trolley.

2.A DEPOSIT/REFUND SERVICE

The deposit is fully or partially refunded upon return of the trolley, at any dispenser

HOW IT WORKS?

Easy to follow instructions are offered on the side panels of the dispensers and at the 19" touch screen (video instructions).

Make a payment/deposit by coins, bill notes or credit card and take a trolley.

In case of deposit/return service, partial or total refund is

provided, once the trolley have been returned to any dispenser after use (optional).

The system is fully automatic, Dispensers can operate in stand alone mode or on network mode, linked via Ethernet with the control Center, where the whole information regarding each dispenser is visualized and managed, allows the supervisor a global view of the operation in real time, optimizing ground staff and trolley inventory management.

THE SYSTEM COMPONENTS

1. DISPENSING UNIT

Automatic trolley release system

Stainless steel body

Guide/rail with more than 50 trolleys capacity

Touch-screen display

Can be used outdoor or indoor

Thermal printer

Ethernet / WiFi communication

System of alarms

Accepts coins/banknotes/credit cards / contact less (NFC)

2. THE CONTROL CENTRE

The software will provide the operator with real time information:

The status of each and all the dispenser

The number of trolleys currently available at each dispenser

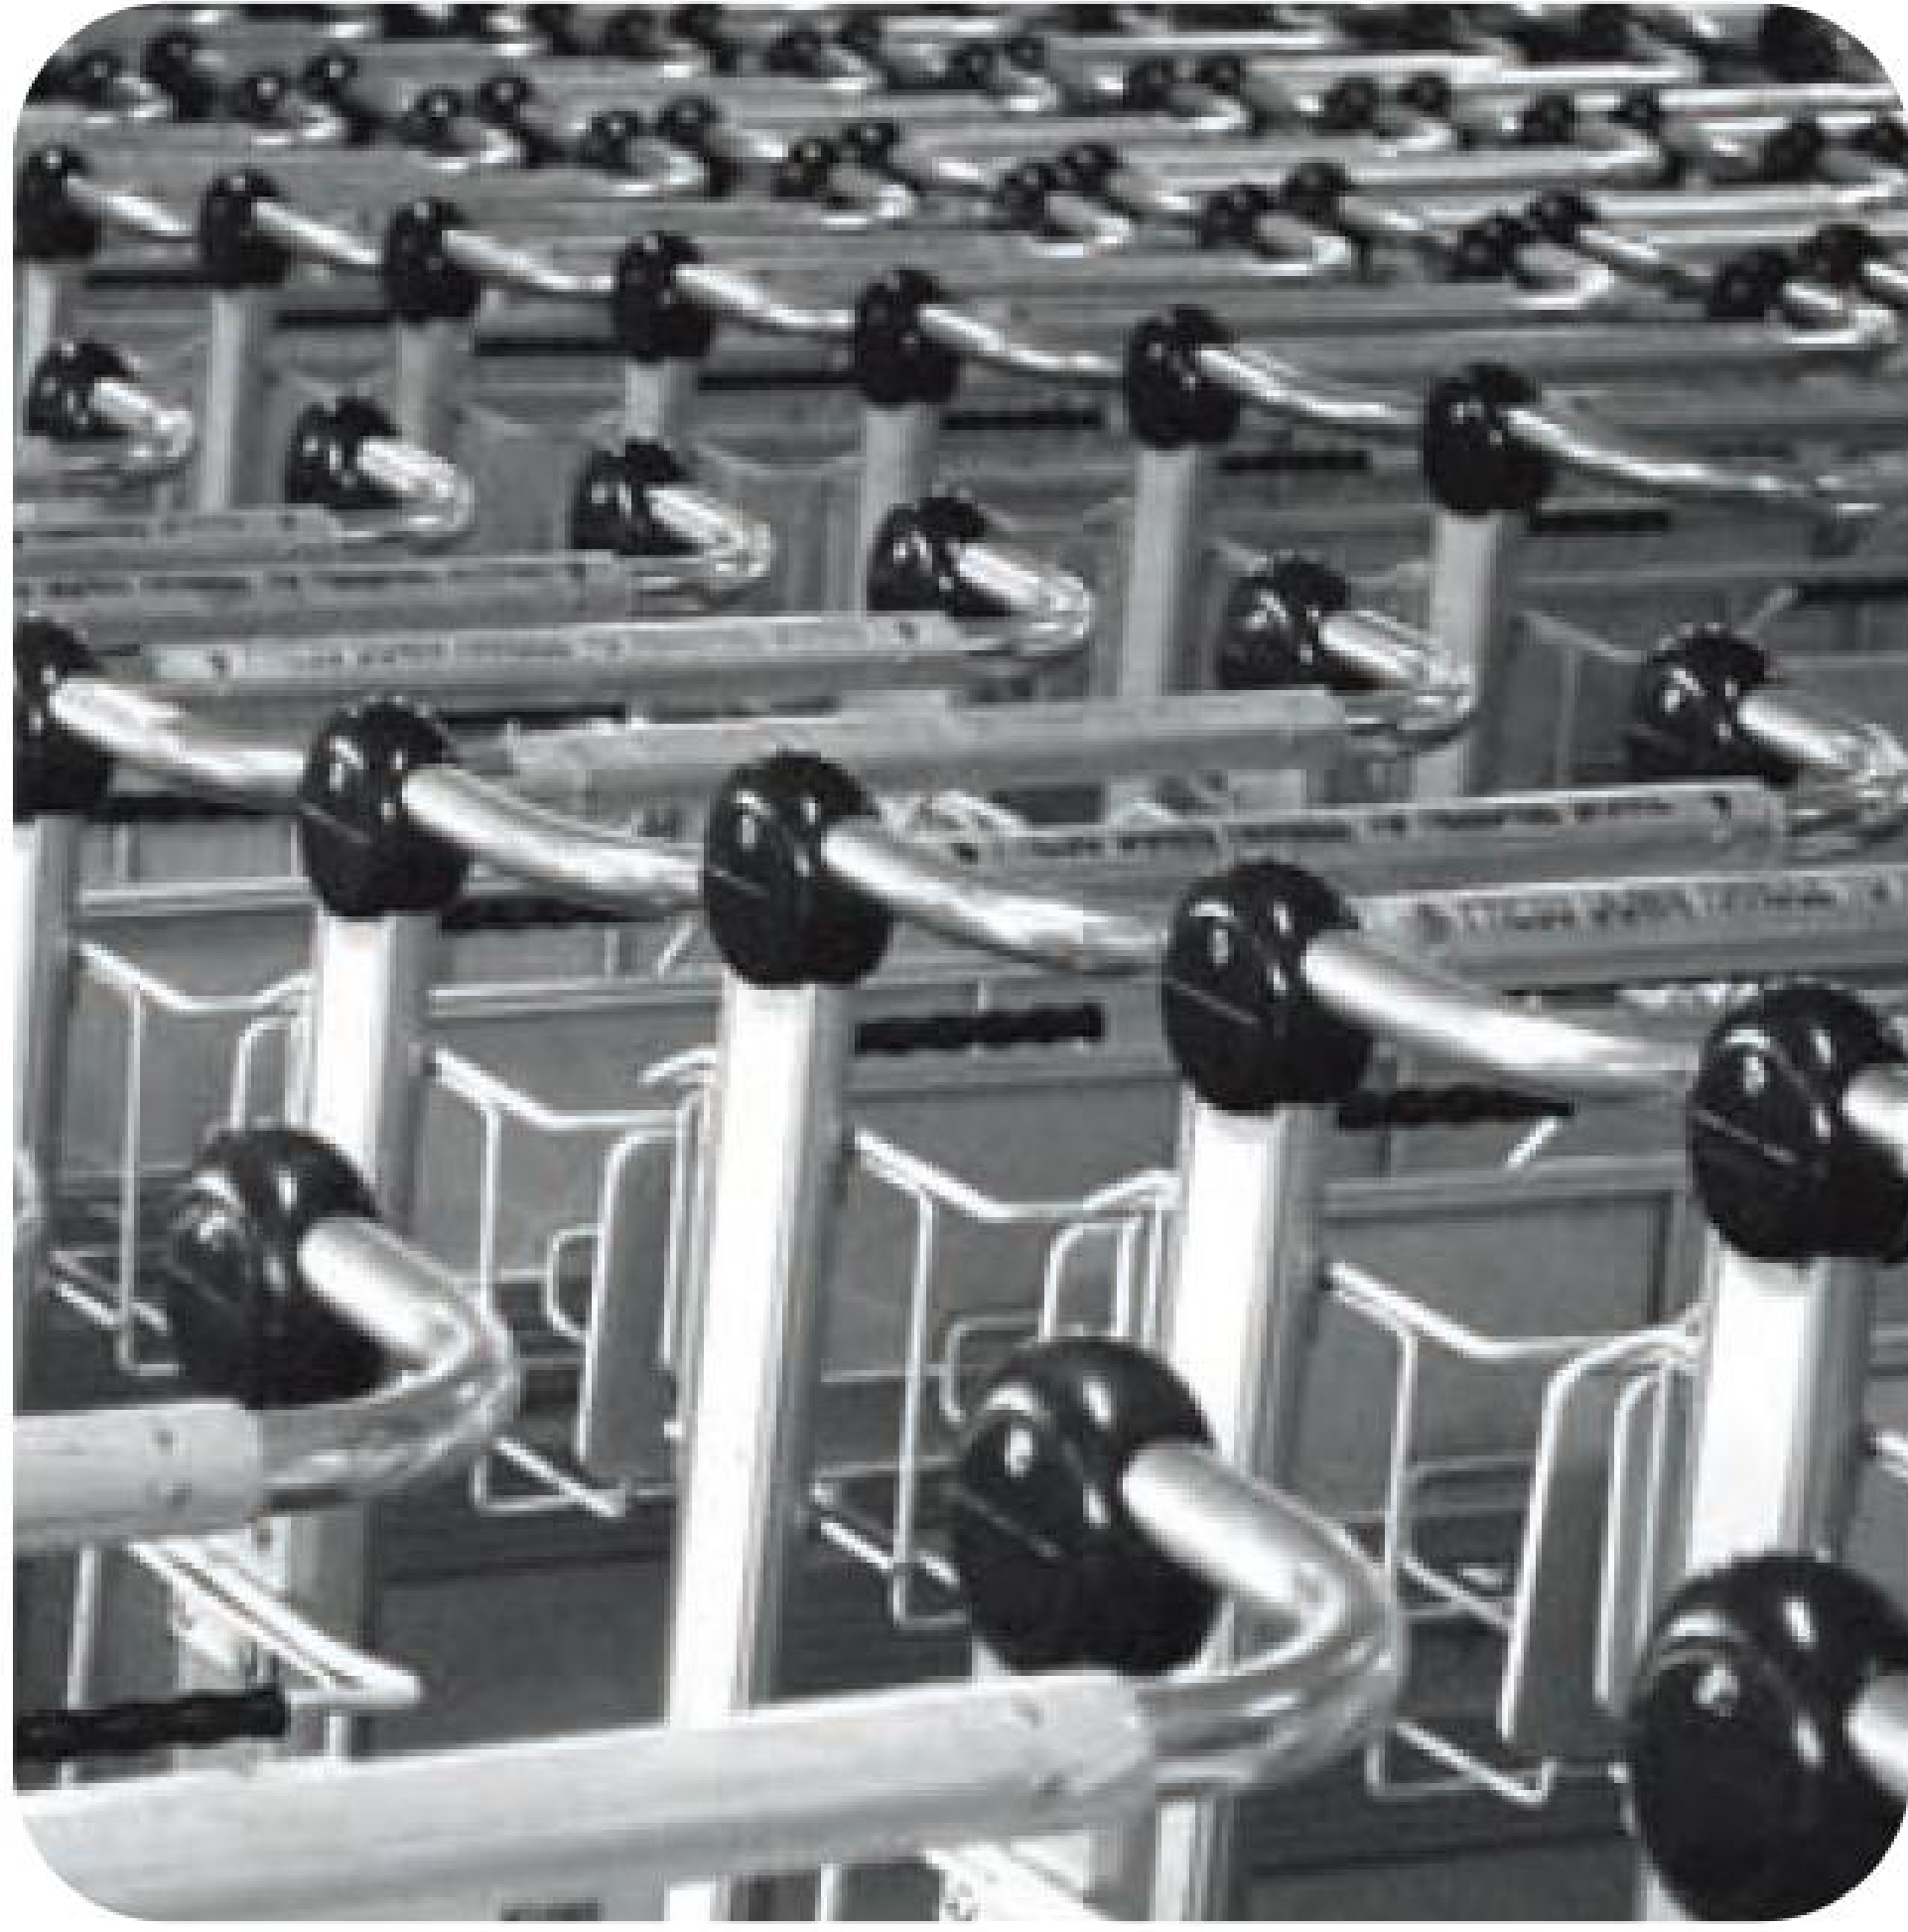

Alarms regarding: min/max quantity of available trolleys, open doors, vandalism, maintenance needs, printer paper, etc..

The amount of money in each dispenser since the last collection

Statistics about service, collections, areas, etc.

Comprehensive auditing functions.
